

Data sheet: WL-578 UK

Product code : WL-578 UK
 Product name : Wireless Network ADSL 2+ Modem Router 54g
 EAN code : 8716502020270

Simply connect this ADSL 2+ Modem Router 54g to your ADSL line, and right away you'll have a base station for an entire wireless home network, as well as being able to take maximum advantage of the benefits of broadband Internet via ADSL. The modem router has a built-in ADSL 2+ modem, so you'll already be fully prepared for the newest developments in the world of Internet. The router function enables all the users in your network to access the Internet through 1 subscription. You don't need to be worried about the communication speed across your wireless network; the modem router works according to the 802.11g standard, and guarantees you an actual throughput rate of a staggering 24 Mbps.

Now includes a Wireless USB Adapter 54g, so you can link your laptop or desktop PC straight into your wireless network.
